

highlight 

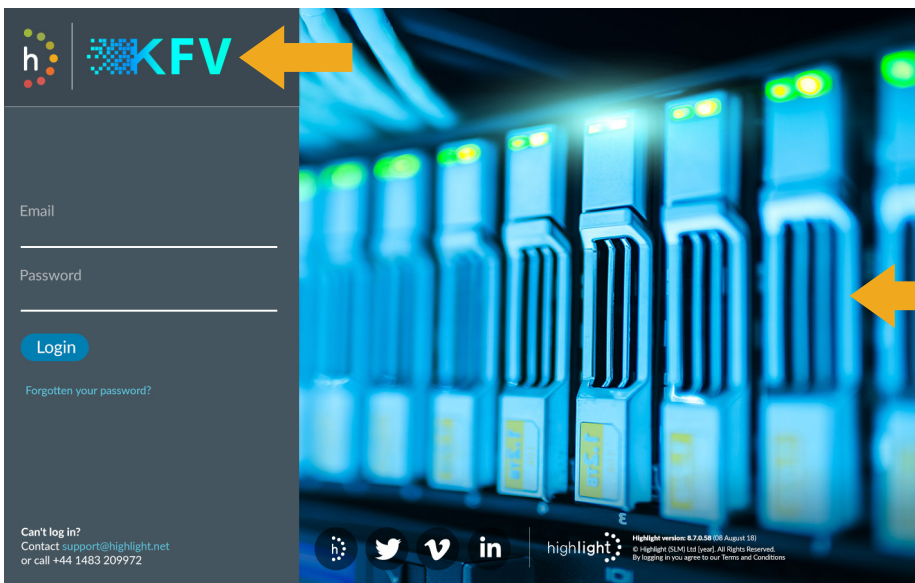

Domain **Branding**

Have Highlight your way

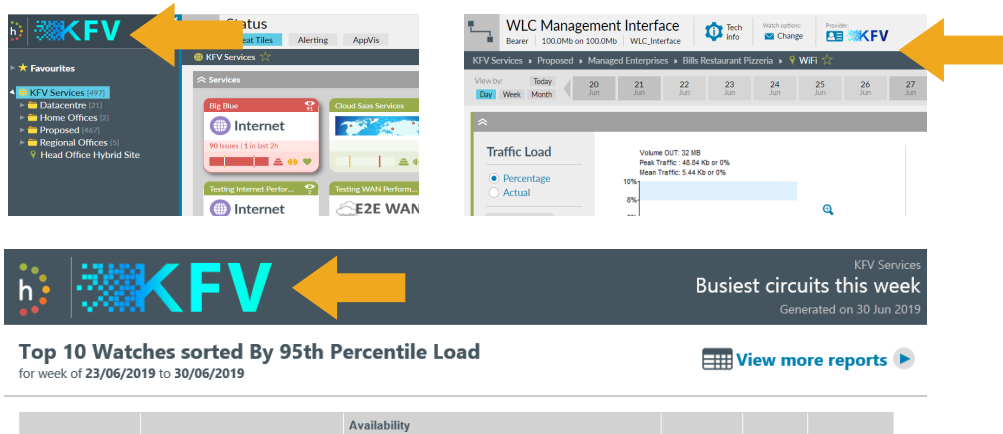

Highlight gives partners an easy way to customise their domain so they can provide a fully branded portal to their staff and customers

Customisable elements

Custom logo and background image on login page

Custom logo on network explorer, details page and emails*

*User welcome emails, expiry emails and scheduled reports

What we need from you

Login background image

Please provide a 1920 x 1080px or larger image, .jpg's are best...
...but we can accept any format

Image guidelines

Due to the responsive nature of the page that allows Highlight to look great on all screen sizes and the left hand side bar covering part of the image, we cannot control how much of the image will be displayed

We strongly suggest avoiding text entirely and keeping the most important parts of the image in the centre right

What we need from you

Logo

We use the logo in both full and compact versions on light and dark backgrounds

The minimum we require is a single large logo (min 300 x 62px)

If you wish to specify how the logo looks at compact size or on both dark and light then please do so

Vector based formats are best (.ai, .eps, svg)...

...but we can accept any format

There is also space for an optional secondary logo, for use by a parent organisation for example, which appears next to the small print in the bottom of the login page

Social media links

By default the login screen displays links to Highlight social media pages currently these are not configurable but can be turned off completely
